# SEPhyE-SEPhyL

SEPhyE-SEPhyL, abreviation for Search for Extraphysical Existence – Search for Extraphysical Life, is a concept created by William Ariel Mounter, inspired by SETI-CETI, which deals with the search for extraphysical existence and for extraphysical life.

The basic concept of sephye-sephyl is the development of hypotheses, theories, methods and technologies for the study of the extraphysical and spiritual question, using concepts such as psiontecnology and spiritotechnology as the basis of its technologies. SEPhyE would be responsible for the elaboration of theories and technologies, while SEPhyL would be responsible for their application and for the search for signs of extraphysical life.

The concept of sephye-sephyl can be very useful for the search for extraterrestrials, if we consider the hypothesis that extraterrestrials are spiritual beings that have evolved or are already on the spiritual-extraphysical plane, the concept of sephye-sephyl can be very useful for the search for not only that, but also as the search for the spiritual question and the extra-scientific question that involves spirituality and the extraphysical itself.

Even so, the concept of sephye-sephyl is hypothetical, although it is still only in the field of ideas, the possibility of creating an analogue to sephye-sephyl is something very interesting to think about, thus being able to revolutionize how natural science and extracience itself addresses the spiritual, extraphysical, and even the whole supernatural issue as well.

Just to make it clear, sephye-sephyl would work in the same style as seti-ceti, with several bases around the world in order to detect some presence, frequency or energy, but in this case, it would be in the extraphysical and spiritual issue. Therefore, it would be necessary to develop a whole theory and technology related to the extraphysical and spiritual issue.
